SUMMARY

Senior Analyst with five years of experience in economic consulting, developing statistical, machine learning, and data science solutions for complex business and litigation consulting engagements. Known for a thorough and creative drive to investigate complex problems and build elegant solutions, and personally fulfilled by the pursuit of excellence and truth. Passionate about using coding and data science to facilitate a tangible impact for clients and end users, while continuously expanding both my own capabilities and those of my peers. Professional accomplishments include launching a new business unit utilizing custom machine learning algorithms, developing a training program that expanded analytical capabilities and rigor, and leading client consultation on a foundational nine-figure transaction.

WORK EXPERIENCE

Senior Analyst, Manager

September 2021 – present

Competition Dynamics, Inc. | Salem, MA

- Competition Dynamics is an economic consulting firm that analyzes, solves, and testifies about economic problems at the intersection of antitrust, intellectual property, and international trade
- As a Senior Analyst, I lead end-to-end analytical projects to serve clients and support high-stakes business decisions
 - Consult with clients to define problems, establish project objectives, and conduct project research
 - Theorize solutions and design methodologies, collaborating directly with Principals to shape strategy
 - Acquire, clean, and analyze complex datasets using statistical modeling and data science techniques
 - Design and refine exhibits, visualizations, and written deliverables to share results with accuracy, clarity, and impact
 - Manage multiple engagements, taking ownership of analytical outcomes and stakeholders communication
- As a Manager of six Analysts, I invest in the growth of others and rigor of the team through mentorship and accountability
 - Hire and develop Analysts through structured mentorship and leadership development programs
 - Designed a robust new hire training program and introduced bi-weekly analytical professional development sessions
 - Build a culture that raises analytical rigor, individual ownership, and professional drive across the team
- In addition to my core roles, I founded and lead a machine learning-based business unit that performs portfolio valuation
 - Identified a niche opportunity and led the creation of a machine learning program that adds novel value to clients
 - Partner with stakeholders to define business development strategies, obtain new clients, and lead consultations
 - Led a client engagement involving a nine-figure asset transfer and leveraged that success into continuing business
